

What is an Accordion Fold?

An Accordion Fold refers to the paper folding method that uses alternating folds to create parallel pleats that resemble the expandable part of a musical instrument called an accordion.

Practice making your alternating folds. Try using a sharp edge of a table to make it easier.

Make your folds parallel. Parallel means that the fold is the same width from the beginning of the fold to the end of the fold. Train tracks are parallel.

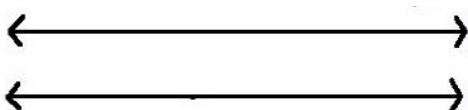

Using your imagination what can you make using this interesting folding technique?
